

## TOP SOLUTIONS FOR ROPS & FOPS CABINS

One partner for ready-to-assemble components.

voestalpine KREMS is your competent partner for innovative tubes & sections made of steel. Our long-term success is based on many years of experience in roll forming. We develop tailor-made solutions with alternative technologies & materials for specific customer requirements and identify market trends at an early stage.

Thus, we pro-actively generate new solutions for the challenges of tomorrow.

Professionalism, reliability and our global network ensure the success of our customers worldwide.

Development and component manufacturing for safety cabs is one of the areas on which we focus our know-how. International leading manufacturers of forklifts, tractors, agricultural machinery, construction machinery and specialty vehicles trust our solutions.

We will stay with you during the entire development cycle, including prototype building.

## STURDY AND COST-OPTIMIZED SOLUTIONS.

### Constructive cooperation.

Looking for new options in function and design? The best possible choice in materials? Top-notch solutions for difficult demands?

We have the answers if you have the questions. Talk to us as early as pre-development. Working together with you, our experts will find the best solutions with the highest cost-benefit-ratio.

### Manufacturing on demand.

We provide unlimited flexibility right up to the point when serial production begins. As specialists in roll forming we know virtually no limits as far as section diameters are concerned.

We offer a wide range of processing options such as bending, laser cutting, pressing, forming and welding to make ready-to-assemble components that will greatly optimize your production processes and costs. We are certified according to ISO 9001, ISO 14001, IATF 16949.

### Logistics for service and success.

To us, logistics means making complex tasks and processes as easy and efficient as possible for our customers, beginning with the human factor:

At voestalpine Krems, we are always available for our customers. Packing and transportation including just-in-time delivery – everything tailored to our customers' needs – is more than basic to us.

We have manufactured thousands of different sections. Contact us.

We offer a unique variety of different cross-sections and customer-specific solutions including the one you need for your safety cabs.

Let us provide you with the latest information on materials and technology developments, of which we are a vital part.
