

## Our Quality-, Safety-, Environmental Policy

The management of voestalpine Giesserei Linz GmbH as a company of voestalpine group is just as committed to a high standard of productivity, quality, safety, health and environmental protection.

- We operate an integrated management system for implementing our guidelines as concrete actions
- We work on the continual improvement of all products, processes and systems through applying the principles of TQM (Total Quality Management). Continual improvement is the task of every member of staff at every level and every area. Senior staff are expected to set an example and to create the necessary conditions of achieving this objective.
- We further the skills and sense of responsibility of our employees and promote cooperation at all levels.
- Achievement of our objectives is monitored through measurable targets and regular inspections.
- For us, quality means the extend to which we meet the demands and expectations of customers, society, staff, suppliers and shareholders.
- We develop, produce and sell products and services
  - which are fabricated or performed by employees who know that every injury and every impairment to health can be avoided;
  - which completely fulfil the quality requirements of our customers in the sense of the zero defect philosophy;
  - which minimize the impact on humans and the environment through the economical use of raw materials and energy and through avoidance or reduction of the environmental effects of our production processes and activities.
- Application of the best available and economically available technology in minimizing environmental impact is just as much a matter of course for us as is compliance with the statutory requirements.
- We participate in open and objective dialogue with customers, contractual partners, the authorities, neighbours and the interested public.
