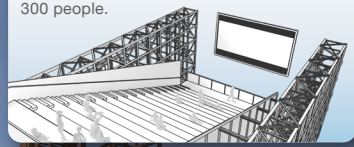
voestalpine open space

A worldwide unique cultural location. Where space and art become an experience.

An open air spectacle

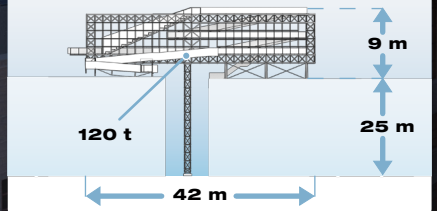
From Höhenrausch to open air cinema. The amphitheater offers seating for 300 people.



Away from the everyday – high above the roofs of Linz – here the voestalpine open space will come into being, a cultural space for exceptional artistic, architectural and entertainment projects and events. Floating 25 meters over the OÖ. Kulturquartier, the accessible architectural steel structure takes front stage, becoming an exhibition piece itself.

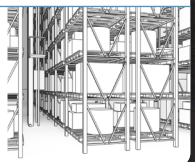
Culture lab at dizzy heights

42 m long, 15 m wide and 9 m high. The first level is at a height of 25 meters. 120 tons of steel will be used in the construction.



This technique takes us to great heights

The system: the open structure of the voestalpine open space is based on a system used in large high-bay warehouses which has been developed and built by voestalpine. This system has been adapted in order to construct the voestalpine open space, and will be used to maximum architectural effect to reflect the fundamental concept of an open space.



A joint project by voestalpine, OÖ. Kulturquartier/Province of Upper Austria & RieplRiepl Architects
