

AUTOMOTIVE ROLLFORMING

From sample part to progress in series

Effectively reducing the weight of the body without compromising safety and design: fine-tune your automotive design skills with the metal forming and material expertise of voestalpine KREMS.

As Europe's market leader, we manage the entire integrated process chain of steel production and processing.

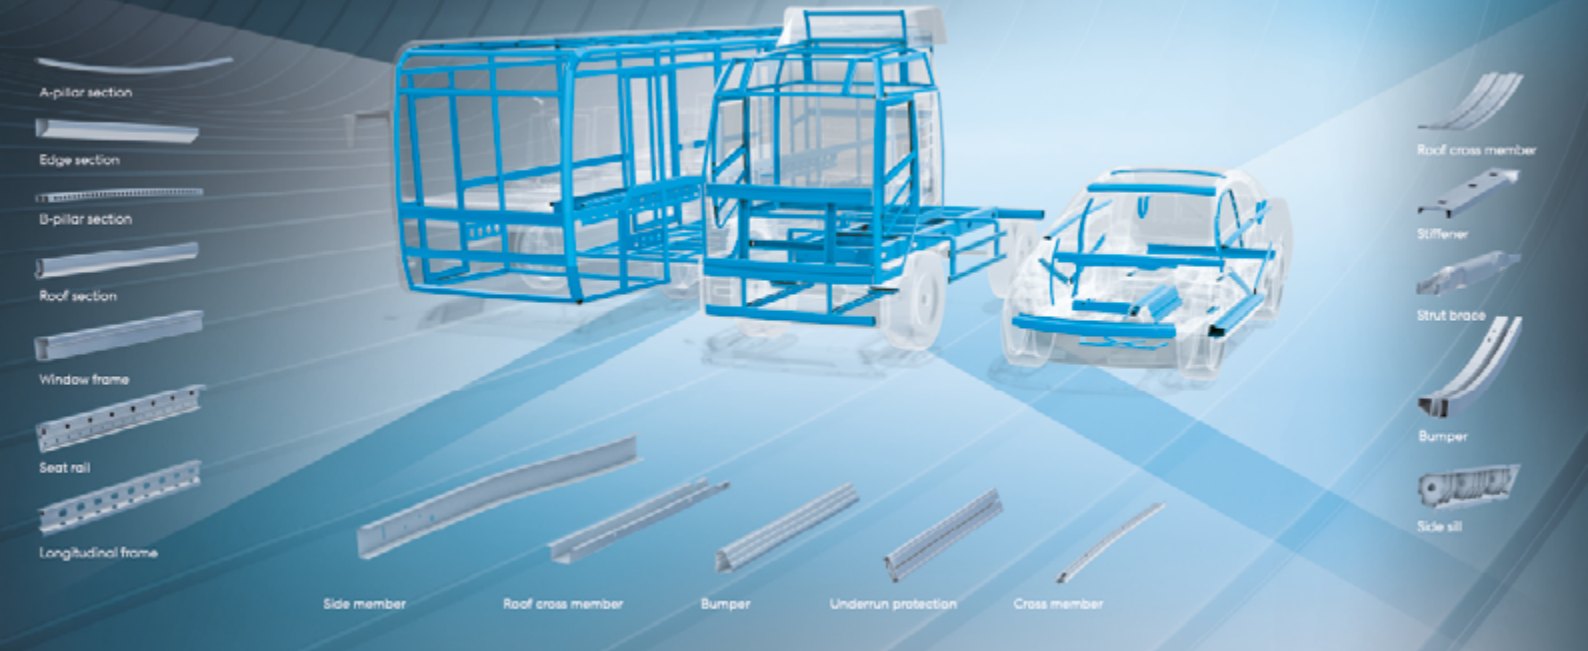

Thanks to our own steel-making facilities, we can plan ahead even in the liquid steel phase to optimize our profile solutions and to ensure components tailored perfectly for you.

Efficiency as a result of co-engineering

Save time and development costs. As your global development partner, we will support you in the design and construction phase by means of co-engineering and the most efficient overall concept.

Security due to global partnership

This concept is based on our worldwide network with over 600 research partners and countless product developments, together with leading car manufacturers. We generate innovations on an ongoing basis to ensure your competitive advantage.

A BROAD BASE FOR THE AUTOMOTIVE SECTOR

We support you throughout your vehicle's entire development cycle and ensure an optimum start-up to series production. We use the most advanced development tools, state-of-the-art production lines and perfectly optimized profile solutions with a virtually unlimited range of shapes and cross-sections, as well as components and assemblies. At voestalpine Krems we also place a wide range of downstream processing

technologies at your disposal.

Be it small batch production, niche vehicle or huge annual volumes, thanks to an optimized process chain, decades of experience and synergies within the voestalpine Group, we can meet your requirements perfectly for passenger cars, trucks and buses alike. Benefit from our expertise and our flexibility – on any scale and for the widest possible range of vehicle types.

TOP-PERFORMANCE DURCH TECHNOLOGIESYNERGIEN

Leading OEMs in the automotive & supply industry and in the commercial vehicle sector rely on our tubes and profiles.

We produce sustainably and at the highest quality level! With the most advanced simulation tools, we meet the most stringent requirements for weight reduction and functional integration.

This means: more efficient body components while meeting the highest safety standards - competing goals in harmony.

As part of the voestalpine Group, we are represented in all major automotive regions and thus always close to your production sites.

A sophisticated global logistics chain enables us to ensure fast and reliable supply to our customers - worldwide - even at peak times.

Count on our end-to-end and fully integrated quality assurance in accordance with IATF 16949, ISO 9001 and ISO 14001.

WORKING TOGETHER FOR THE BEST SOLUTION

We support you throughout the entire development cycle, including the prototype phase.

UNIQUE EXPERTISE IN STEEL MATERIALS AND PRE-PROCESSING

Together with the materials experts in the voestalpine Steel Division we develop innovative materials concepts and make the most of the synergy effects as part of the voestalpine Group for our customers' benefit.

LONG-ESTABLISHED PARTNER TO LEADING OEMS

Leading OEMs and supply partners have trusted our tubes and sections solutions for years!

CUSTOMISED LOGISTICS SOLUTIONS

We find the perfect supply chain – via train, sea, lorry and even air – to optimise your workflows.
