

LEOVA[®] HARVESTAR

Super strong for mechanical harvests

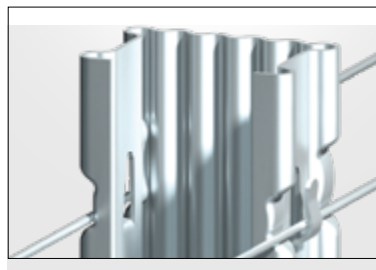

LEOVA® HARVESTAR – THE CLEVER HARVEST HELPER

The innovative stamped post is designed specially for use by harvesters. The patented safety wire prevents accidental lifting of the guy wire or the shaped profile protecting the harvester and damage to the harvester or deformation of the hooks.

This makes leova® HARVESTAR super strong for your yield!

Convincing efficiency

- » Safer, problem-free harvester use
- » Less maintenance after picking
- » Surface-protecting design prevents damage to posts and wire
- » Durable
- » Complete system
- » Patented safety wire prevents damage

Strip galvanised according to EN 10346, closely batch galvanized 600 g zinc/m²
