

Shipping Prices

Valid as of 1st June 2006 / Prices in EURO/t

Regulations on the Calculation of Freight Prices

1. Shipping Costs

We will gladly ship your order and will calculate the shipping charges applicable on the date of delivery according to the attached freight tables.

In the event of shipment by railway to the station of destination

In the event of shipment by truck to the station of destination

Surcharges apply as agreed in the event of foreign shipments. For partially loaded vehicles the agreed minimum freight charge shall apply per transport unit.

In the event of shipment on boat or shipment on combined routes by land and water to the rate station or port of unloading (subject to special arrangement)

Freight costs are determined and agreed on an individual basis for destinations not listed in the freight table.

Further shipping costs

To the extent that additional costs are not taken into consideration in the freight catalogue of the dispatching works, these costs are calculated by us separately. The Buyer bears additional costs that occur as a result of shipment and for which no surcharges are agreed. We shall bear the costs in the event they are incurred by us.

2. Shipping Regulations

We shall be authorized to refuse the loading of vehicles that do not appear to be suitable for safe transport or that do not have access to the required materials for secure loads.

The customer shall bear the responsibility unloading, shall completely empty unloaded railcars and loading units, clean or decontaminate them appropriately and return them to the freight carrier complete with all loose items.

3. Freight-Tables
