

Invariably variable:

Cut shapes in a variety of symmetrical and asymmetrical forms

Cut shapes from wide strip

The new multiblanking line with swivel shears further broadens our service spectrum. Take advantage of the new cut shapes in trapezoidal and parallelogram forms. We offer an open mind and cooperative hand to meet the individual logistics requirements of our customers, and our specialized knowledge for many different industrial sectors make us a profitable business partner.

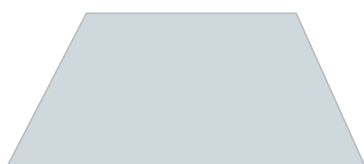

Benefit from the convincing advantages of our cut shapes:

- **Tailor-made solutions**
including skewed cuts with an infinitely variable selection of angles ranging between 0° and 30°.
- **Quality and cost optimization**
when compared to shapes cut at your company. Our cutting processes are technologically optimized and utilize the most modern precision techniques.
- **Go-side upon customer request**
The units can be turned to position the go-side and/or burr as desired.
- **Secure packing**
The shapes are packed with metal or wood packaging materials.
- **Just-in-time delivery**
Our supply chain management system provides the customer with optimum logistics solutions.

Shape optimisation for a high degree of efficiency

Steel-hard facts speak for our cut shapes

Material tensile strength	up to 1000 N/mm ²	Cutting edge grade	laser-weldable
Strip width	up to 1,850 mm	Multiblanking	four strips
Cut shapes		Surface grades	B & C for exterior components (O 5)
Lengths	300 – 6,000 mm	auto shell	
Widths	300 – 1,850 mm	Packaging	metal or wood
Thicknesses	0.3 – 3.0 mm	Arc cut	arc height of 300 mm max.
Angles (infinitely variable)	from 0° to 30°		
Maximum coil weight	35 tons		

A cutting edge ahead

With more than 300 qualified staff members, voestalpine Stahl Service Center GmbH is an affiliate company of the internationally successful voestalpine Group. Uncompromising quality, reliable order processing, flexibility and innovative power make us a leading European provider of split strip and cut sheets.

More than 600,000 tons of steel strip are processed annually on slitting and cut-to-length lines. Smooth, process-oriented and integrated work

steps under continual quality optimization assure just-in-time deliveries in a variety of grades. Our comprehensive and high-performance logistics guarantee the highest loyalty to delivery deadlines.

The high capacity and technology of our international company benefit our customers with every order.
