DryTec®

voestalpine Tubulars DryTec® is the dope-free alternative for Premium Connections, currently available for VAGT® and VASuperior®. DryTec® increases your efficiency and safety on-site and helps you to protect the environment.

PRODUCT CHARACTERISTICS & CUSTOMER BENEFITS

LUBRICANT FREE

» SAVES PREPARATION AND INSTALLATION TIME

Compared to thread connections with thread compound, where transport/storage compound has to be removed and installation compound has to be applied, connections with DryTec® are ready to install. Therefore, DryTec® stands for easier handling and cost savings by elimination of work steps.

» ELIMINATES THE RISK OF WELL CONTAMINATION

Excess thread compound could clog sand screens, valves, and perforating guns. It could cause wire line failures and completion fluids contamination. It causes damage to the near-well zone by clogging pores and reducing the inflow rate. DryTec® protects you from these problems.

SAFE & ENVIRONMENTALLY FRIENDLY

» PREVENTS YOU FROM TROUBLES

Compared to thread compounds, DryTec® means no pollution at the rig and in the well. It increases the safety of your staff and reduces the impact on the environment.

PROTECTIVE DESIGN

» PREVENTS YOU FROM UNEXPECTED COSTS

Compared to thread compounds, DryTec® provides an additional corrosion protection during transport and storage. It eliminates failure potential caused by too much or insufficient lubricant application and improves make-up, even for multiple make-up, at the same time. In addition, this dry alternative decreases the danger of contamination of the connection on site (e.g. with sand).

READY TO INSTALL

» SAVES WATER

DryTec® connections are ready to install. Compared to connections with thread compound, no water is needed to remove transport/storage compound. Therefore, DryTec® stands for easier preconditions for your running/installation work on site.

SERVICES

myTubulars

myTubulars APP PRODUCT DATASHEETS, FIELD SERVICE AND LICENSEES

Generate datasheets and load envelopes containing dimension and performance data for products provided by voestalpine Tubulars with our Datasheet Generator. You can quickly and easily check the product application against field requirements in advance also on your tablet or smartphone by using the myTubulars App.

myTubulars is available for all iOS and Android devices for free in the App stores.

GET THE APP!

Field Service during the installation can be provided upon request. Please visit the Customer Service site on our web page www.voestalpine.com/tubulars

WHY voestalpine Tubulars?

Support from material and product selection, in-house material and product development, to final product and installation consulting from one source.
