DESIGN CHARACTERISTICS

voestalpine Tubulars Proprietary Connections like VAwizard® offer benefits which are not addressed by the API specification or exceed the API standards.

PRODUCT CHARACTERISTICS & CUSTOMER BENEFITS

LOWEST HOOP STRESS & HIGHEST YIELD TORQUE

» ENSURES WELL INTEGRITY

With its low hoop stress combined with high torque capability, VAwizard® is the connection of choice for multi-fractured horizontal wells. The connection performance is fit for purpose tested for this area of applications.

MINIMIZED RISK OF JUMP-OUT

» AVOIDS FAILURES UNDER BENDING LOADS

The connection design minimizes the risk of jump out failures under bending loads.

INTERCHANGEABLE WITH API BUTTRESS

» SAVES COSTS

VAwizard® is fully interchangeable with API Buttress, allowing greater flexibility in string design.

ROTATION DURING INSTALLATION

» IMPROVES QUALITY OF CEMENT BOND

The thread design offers the opportunity to rotate the casing string during installation. Due to the thread profile, the connection is able to handle axial loads without inducing high radial forces to pin and box.

GRADES

VAwizard® is available in API standard and proprietary grades. Also tailor-made customer specifications can be fulfilled upon request.

Our tools in manufacturing the VA series include but are not limited to

- » Steel with special chemical composition
- » Unique melting, refining and casting practices
- » Controlled processes in the pipe rolling, heat treatment, straightening and end finishing operations
- » Tighter tolerances
- » Restricted mechanical properties
- » Special testing and inspection methods

Some of the product names explain the application, e.g. deep well, sour service, low temperature.

The applications for other grades are defined as follows:

- » **VA-High Collapse-Series**
for use in high external pressure environments
- » **VA-Mild Sweet Gas-Series**
for mildly corrosive environments where – in combination with an adequate inhibition program – a higher corrosion resistance can be expected compared to regular API grades

Specified Minimum Yield Strength [psi]	Grade API Spec 5CT	HIGH COLLAPSE	ENHANCED PROPERTIES

Performance properties for proprietary and other grades or for special clearance couplings on request.

P_i ... internal yield pressure

P_c ... collapse pressure

S_y ... joint yield strength

S_u ... joint ultimate strength - API joint strength
(calculation according to API 5C3)

L ... max. load on coupling face

B ... max. bending (uniaxial)

T_y ... connection yield torque

Other grades on request.

This table shows the values at printing date of this brochure. Actual values available in the Datasheet Generator on our Web Page or in the myTubulars App.

Recommended make-up-torque using a thread compound with a friction factor of 1.0.

Maximum torque: optimum + 10 %

Minimum torque: optimum - 10 %

Special clearance and 20° beveled couplings have a lower load on coupling face.

myTubulars APP PRODUCT DATASHEETS, FIELD SERVICE AND LICENSEES

Generate datasheets and load envelopes containing dimension and performance data for products provided by voestalpine Tubulars with our Datasheet Generator. You can quickly and easily check the product application against field requirements in advance also on your tablet or smartphone by using the myTubulars App.

myTubulars is available for all iOS and Android devices for free in the App stores.

GET THE APP!

Field Service during the installation can be provided upon request. Please visit the Customer Service site on our web page www.voestalpine.com/tubulars

WHY voestalpine Tubulars?

Support from material and product selection, in-house material and product development, to final product and installation consulting from one source.
