

Böhler Welding issues stainless steel cored wire catalogue

Filler metal specialist Böhler Welding has issued a new catalogue with the title “Stainless steel and nickel-base cored wires for lasting connections”.

The vast range of products presented in this handbook style catalogue covers a great variety of ferritic, austenitic, duplex and soft-martensitic stainless steels, including grades for high temperature applications, for car exhaust systems and for hydro turbines. The nickel-base range features products for most commonly applied alloys such as Alloy 600, 600L, 625, 800 and 800H.

The catalogue features a division in all-positional cored wires and types for downhand use, with the objective to provide the best productivity options for end users. In-depth information on stainless steel cored wires and their potential to increase welding productivity is given in the remainder of the catalogue, along with advice on joint types, welding parameters for all positions and recommendations for safe storage and handling.

A copy of the catalogue in English can be downloaded from <http://www.voestalpine.com/welding>

voestalpine Böhler Welding

About us

voestalpine Böhler Welding

Is a leading manufacturer and worldwide supplier of filler metals for industrial welding and brazing applications. As a part of the voestalpine Group, one of the world's leading suppliers of specialized steel products, voestalpine Böhler Welding is part of a global network of metallurgy experts. With more than 100 years of experience, the enterprise has decisively influenced the development of welding technology, setting the benchmark with its innovative solutions. With its three areas of competence – Böhler Welding for joint welding, UTP Maintenance for repair and maintenance welding and Fontargen Brazing for soldering and brazing – outstanding solutions for all challenging welding projects in demanding industries are offered. Metal Engineering Division

The voestalpine Metal Engineering Division is the global market leader in turnout technology and complete rail systems, and is the European market leader in special rails and quality wire. The division is also a leading provider of seamless tubes and high-quality welding consumables. Customer segments include the railway infrastructure industry, the oil and gas industry, the steel and construction industry, as well as the mechanical engineering and automotive industries. In the business year 2015/16, the division and its Steel, Rail Technology, Wire Technology, Tubulars, Turnout Systems, and Welding Consumables business units generated revenue of more than EUR 2.85 billion, of which around 43% was generated outside of Europe. The division, with its approximately 12,700 employees worldwide, reported an operating result (EBITDA) of EUR 385 million.

The voestalpine Group

The voestalpine Group is a steel-based technology and capital goods group that operates worldwide. With around 500 Group companies and locations in more than 50 countries and on all five continents, the Group has been listed on the Vienna Stock Exchange since 1995. With its top-quality products, the Group is one of the leading partners to the automotive and consumer goods industries in Europe and to the oil and gas industries worldwide. The voestalpine Group is also the world market leader in turnout technology, special rails, tool steel, and special sections. In the business year 2015/16, the voestalpine Group reported revenue of EUR 11.1 billion and an operating result (EBITDA) of EUR 1.6 billion; it had around 48,500 employees worldwide.
