

WELDNET® MATERIAL MANAGER

The smart way of welding

weldNet® Material Manager is a web application for base material selection, welding consumables selection, welding recommendations and validity status of relevant standards.

The main customer benefits of the weldNet® Material Manager:

- » **INDIVIDUAL:** All information you need to find the right application, depending on your specific requirements.
- » **SUPPORTIVE:** Filler metal recommendations for a wide range of weldable steels and nickel-based alloys.
- » **AVAILABLE:** 365 days a year, 24/7. Usable with any technical end device via the internet.
- » **RELIABLE:** High quality results thanks to intelligent searching in continuously updated databases.
- » **FAST:** Display of search results in real time.

weldNet® Material Manager is available in two versions

FREE VERSION

- » Limited access to material database and full access to filler metal data
- » View AWS/EN standard classifications

PREMIUM VERSION (9,99 € monthly or 79,99 € yearly)

- » Full access to material database and filler metal data
- » Full access to the assignment of standard and material and the display of welding recommendations for creating a WPS
