

Engineered Products

DIE CASTING

voestalpine DISTRIBUTOR RINGS - AM designed for pure performance

Over the years, our customized distributor rings have proven their superior quality in all major industry segments such as automotive, white goods and many more.

YOUR ADDED VALUE

voestalpine AM Distributor Rings for die-casting applications are produced with **premium materials by BÖHLER/Uddeholm**. Used mainly in two-plate die casting molds, these finished products include voestalpine heat treatment, final machining, eifeler PVD coating, and customized conformal cooling.

Our additively manufactured (AM) distributor rings offer outstanding high-temperature wear resistance, excellent ductility (gross crack resistance), premium tempering resistance, significant soldering reduction, high heat-checking resistance, as well as high thermal conductivity. AM versions are further enhanced with our customized high-performance conformal cooling design to attain the highest efficiency in die temperature control. With their superior properties, these distributor rings are designed to increase your OEE.

Main Properties

- Outstanding high-temperature wear resistance
- Premium tempering resistance
- Excellent ductility (safety against cracks)
- High soldering resistance
- High thermal conductivity

INDUSTRIAL PERFORMANCE COMPARISON

- » **Reduced cycle time**
- » **Increased lifetime**
- » **Reduced maintenance effort**
- » **Reduced fluctuations in casting quality**
- » **Increased flexibility**
