

Jump Frog

Description

The Jump Frog is ideal for applications with low tonnage and low speed on the diverging route. Design incorporates a continuous running rail on the through route and flange bearing ramps on the diverging route.

FEATURES & BENEFITS

- » Eliminates impact loading on through route
- » Reduces noise and vibration
- » Reduces maintenance:
 - » Robust design uses high solidity manganese/EDH
 - » No moving parts
 - » Not affected by Thermal CWR stress
- » Made in North America for heavy haul traffic
- » Designs can be adapted to any requirements:
 - » Available in 115, 132, 133, 136 & 141 lb. sections and provides the best economy in No.'s 6 through 14
