

Partial Flange Bearing Frog

Description

The partial flange bearing frog is a hybrid of a conventional self-guarded frog and a pure flange bearing frog. Depending upon wear profile, wheels traverse the frog in either tread or flange bearing mode. This distribution of wheel loading yields significant improvement in frog life.

FEATURES & BENEFITS

- » Designed for yard terminal and transit applications
- » Robust solid manganese body
- » Universal toe/heel rail
- » Reduced point impact
- » Reduced point wear
- » Reduced noise and vibration

Thank you very much for your interest. Please visit our web site or contact a Nortrak sales professional if you have any questions or if you need assistance.
