

# PRECISION PROFILES FOR BUILDING SERVICES ENGINEERING

---

**Production for renowned manufacturers of facade construction elements, partition wall systems, fastening systems, sanitary rear wall systems, tile rail systems, heating systems, escalators and elevators**

- ✓ Production from stainless steels (V2A, V4A and Duplex), strip galvanized as well as cold and hot rolled strips
- ✓ Stainless steel surface finishes matt/2B, high-gloss/2R, brushed or designed with the highest demands on the visible surfaces
- ✓ Special feature: Fulfilment of visible surface requirements even without foil
- ✓ Widths from 8.5 mm  
Wall thicknesses from 0.3 to 4 mm  
Lengths from 50 mm to 14 m  
(special lengths beyond that)
- ✓ Recommendations for potential savings and advice on materials, design and production

## APPLICATION EXAMPLES

- » **Tile decoration rails**
- » **Mounting rails** for system buildings
- » **Cover strips** for facade cladding
- » **Back wall constructions** in the sanitary field
- » **Handrails** for escalators

### Quality in every respect

- » First-class quality in a wide range of materials and also in smaller batch sizes
- » Flexibility through modular machinery in terms of both material and batch sizes
- » 100% compliance with the most complex profile cross-sections and low tolerances
- » Production of particularly small, thin-walled and yet stable geometries
