

OUR STAINLESS STEEL EXPERTISE: CONSISTENT QUALITY BY UNIQUE KNOW-HOW

Our standard: Open stainless steel profiles with wall thicknesses from 0.3 – 4 mm
Our specialty: Laser-welded, closed stainless steel profiles up to a wall thickness of 1 mm

As a specialist for stainless steel, we have an outstanding position in the market: We are one of only very few manufacturers who can produce cold-rolled special stainless steel profiles in outstanding top quality. This means that we are able to meet the challenges of this material particularly well.

- ✓ Special design of the tools in construction and tool making
- ✓ Production from stainless steels V2A, V4A and duplex only from approved suppliers of known origin with inspection certificate (plant-specific or according to EN 10204-3.1)
- ✓ Special machine design, filter systems and rolling emulsions
- ✓ Stainless steel surface finishes matt/2B, high-gloss/2R, brushed or designed with the highest demands on the visible surfaces
- ✓ Special feature: Fulfilment of visible surface requirements even without foil
- ✓ Special packaging regulations and regular shipping companies

APPLICATION EXAMPLES IN STAINLESS STEEL

- » **Tile decoration rails**
- » **Closing leafs** for doors and gates
- » **High-gloss decorative moldings**
in vehicle construction
- » **Special profiles** as modern lamp bodies
- » **Upright profiles** for refrigerated storage

A job for professionals to your advantage

Due to the special material properties of stainless steel, the processing of this noble and valuable preliminary material requires special skills in the design of tools and machines, preliminary material selection, forming and foil handling as well as packaging and logistics. We master these challenges for you every day!
