

CUSTOM MADE PROFILES FOR AGRIVOLTAICS

FLEXAGRI

FRAME SYSTEM FOR VERTICAL SOLAR STRUCTURES

- » Optimal use of land both for agriculture and energy purposes
- » High land use rate with minimal impact on agricultural yield
- » Project specific design and production
- » For bi-facial panels in landscape

YOUR ADVANTAGES:

- » For flat and sloped terrains
- » Boltless column-beam connection
- » Minimal shadow impact on panels due to optimized steel frame
- » Minimal accumulation of dirt and weeds on steel frame
- » High quality surface treatment
- » Possibility to integrate water sprinklers
- » Economical foundation by pile driving
- » Ready-for-assembly (Meccano system)

4GW

Over 4GW of solar realizations

>30MW

Production capacity of more than 30MW/week

14 years of experience in solar projects

Own engineering offices with over 25 engineers

Intelligent ready-to-assemble solutions

Over 75 years of experience in cold roll forming

Subsidiary of the Austrian group voestalpine

ISO- & CE-certified solutions
