

FLEXIBILITY

The Flexroof system can handle multiple pitch dimensions and slopes. Dismantling and rebuilding is possible without loss of quality (solid, reusable bolt/nut connections).

ENGINEERING

In-house engineering and helpdesk at your disposal.

PRODUCTION

Vertically integrated manufacturing capability.

CONFORMITY

voestalpine SadeF profile solutions are CE certified and have an ISO 9001 and 14001 certification.

DURABILITY

Metallic coated steel components to guarantee a long lifetime.

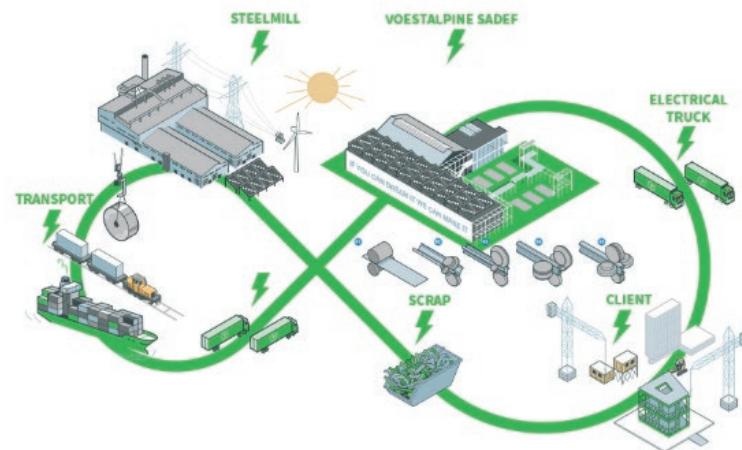

FASTFOOT

Concrete blocks with pre-drilled holes allowing a quick installation and evacuation of water, snow, branches and leaves.

Online tool for project specific design, including local design standards. The system generates detailed drawings, ballast plan, 3D images and Bill of Materials.

FLEXROOF

SADEF SOLAR STRUCTURES

LANDSCAPE & PORTRAIT FOR ROOFTOP

FEATURES

- » Quick and easy to install (Click-system)
- » Thermal disconnection
- » Easy to earth
- » Compatible for green roofs
- » Pre-drilled concrete tiles: FastFoot
- » Calculation tool available for partners: iSolar
- » Integrated cable trays optional

ADVANTAGES

- » Modular and adjustable for large range of panels
- » One component fits for multiple row distances and tilts
- » Unobstructed roof drainage
- » Specific solutions for large scale projects
- » Over 75 years of experience in building systems

SPAN-TO-SPAN FOR ROOFTOP & CANOPIES

FEATURES

- » Tailor-made solutions
- » Specialized in-house engineering
- » Roofspans up to 8 m possible
- » PV-mounting perpendicular or parallel to building-spans
- » Easy to earth
- » Thermal disconnection

ADVANTAGES

- » Optimized roof surface
- » Including static note
- » Over 75 years of experience in building systems
