

Guide for external companies who access construction sites on the works premises

1

Registration in portal for external companies

Ensure that your company has properly registered you on the third-party company portal.

The general procedure is that your company registers you in consultation with the project manager.

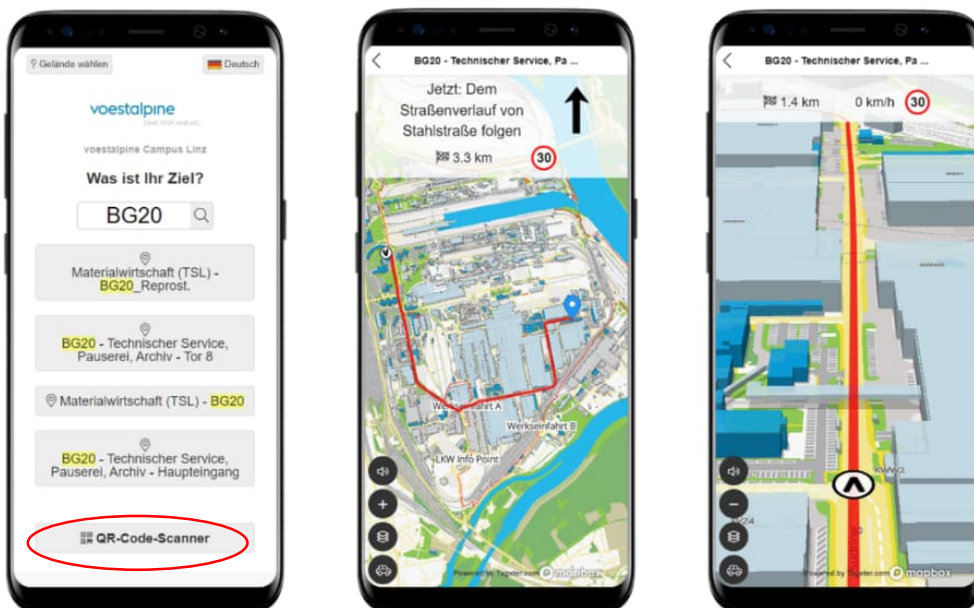

Registration of your construction site vehicle is mandatory.

You are not permitted to access the construction site in a private vehicle.

2

Installation of the vps navigation app

Install the vps navigation app on your smartphone so that you can easily find your way on the works premises.

Your first point of contact on the works premises is the Building 62 (BG62).

You will receive your works ID after you pass the SATRE safety training exam. We recommend that you complete the training on the designated Internet platform. [SATRE](#)
This way you can complete the training whenever and wherever you want.

Office hours for works ID cards in Building 62 (BG62)

Monday through Thursday from 6:15 a.m. to 11:45 a.m.

(Training sessions must begin at 11:15 a.m. at the latest.)

Friday from 06:15 a.m. to 10:00 a.m.

(Training sessions must begin at 09:30 a.m. at the latest.)

Registration and works access are not possible without official picture identification.

Non-EU citizens must provide a work permit in addition to official picture identification.

4

Third-party shuttle parking lot at Lunzerstraße

After receiving your works ID card, you can drive to the third-party shuttle parking lot at Lunzerstraße.

You can park your private vehicle there.

5

Construction-site parking spaces

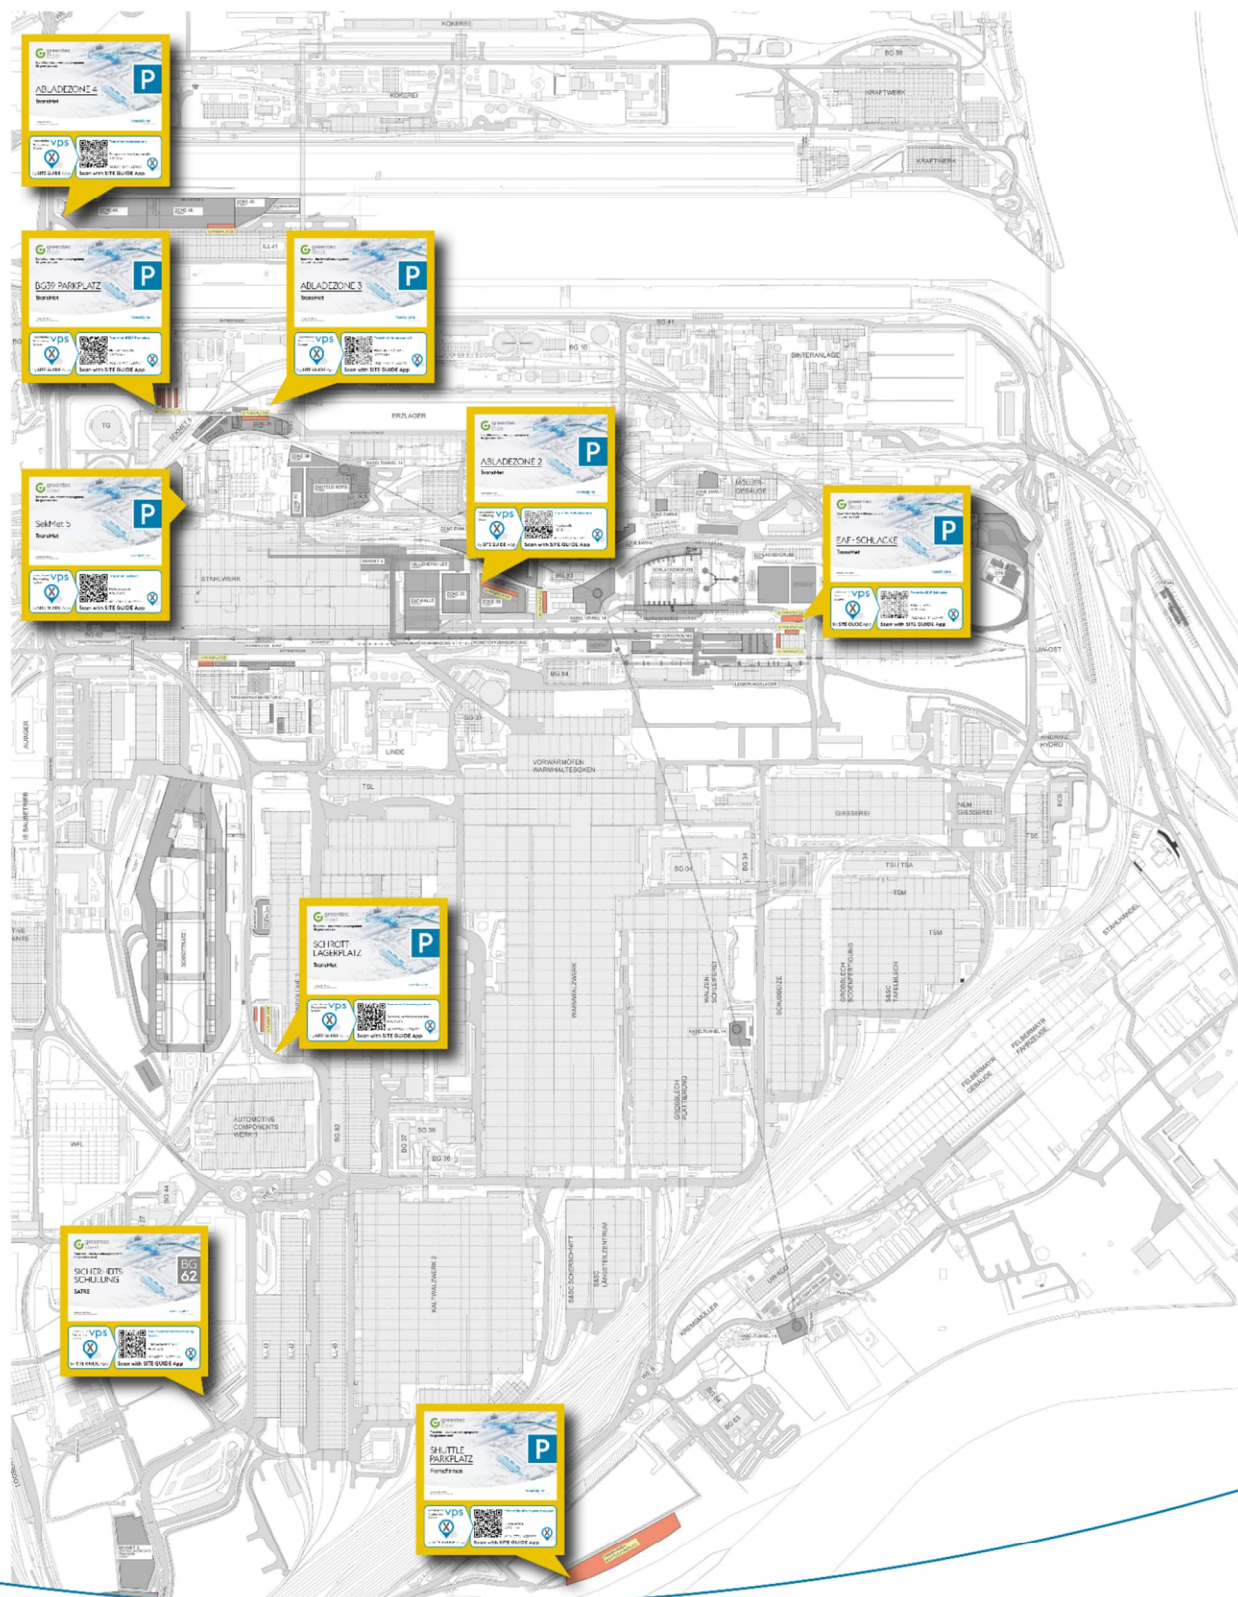

Now that your company vehicle has been registered, you can drive to the construction site on the works premises and use the designated parking spaces.

Please see the enclosed works map with all TransMet construction-site parking spaces.
