

multiface®

THE ANTI-FINGERPRINT SOLUTION

Multi-purpose application

Additional functional treatment: Anti-fingerprint system

multiface® fact sheet | Stand 08/2018

THE ANTI-FINGERPRINT-SOLUTION

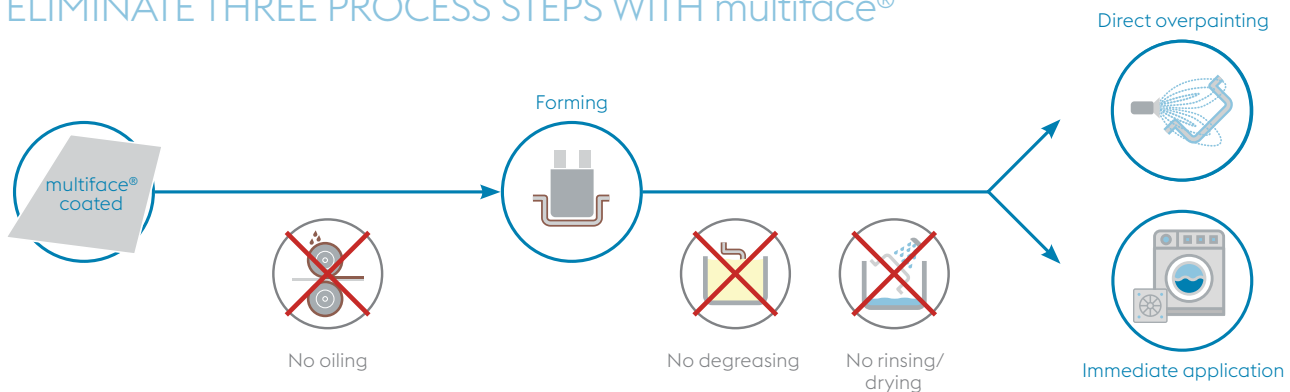

multiface® is a multifunctional, nearly invisible protective coating with excellent anti-fingerprint properties. The coating provides excellent corrosion protection during transport and storage and very good forming properties without having to employ any additional lubricants. Components coated with multiface® can be painted or adhesive-bonded without any additional conditioning and can be processed immediately. The surface features very good adhesive properties.

REDUCED NUMBER OF PROCESS STEPS

When using steel strip coated with multiface®, the oiled part must not be degreased, rinsed or dried. The direct formability and excellent adhesive properties of the material make it possible to directly overpaint or use the material immediately following the deep-drawing process. This substantially reduces the processing costs.

ELIMINATE THREE PROCESS STEPS WITH multiface®

TYPICAL APPLICATIONS

As a result of its excellent properties, steel strip coated with multiface® is suitable for a number of applications. multiface® applications are particularly found in the household-appliance and construction industries:

- » Control cabinets
- » Household appliances
- » Ventilation technology
- » Sections

Our technical specialists would be pleased to provide information on further applications in other industrial segments in which the advantages of multiface® can play an important role.
