

In-Depth Know-How

## A 202 M HS

Your experts for brazing. Through deep insight into processing methods and ways of application, Fontargen Brazing provides the best brazing and soldering solutions based on proven products with German technology. The expertise of this brand's application engineers has been formulated over many years of experience from countless application cases.

# FONTARGEN A 202 M HS

## New CuSi3Mn1 - Laser Brazing Generation

A 202 M HS wire with improved properties in order to optimize brazing process:

- » Ultrapure and smooth wire surface, therefore excellent slide and feeding properties.
- » Improved behavior at joining of steel sheets with different zinc coatings.
- » Exact reproducibility of parameter adjustments.
- » Less or no rework.
- » No risk of twist of the wire because bigger drum diameter of 650 mm.
- » Brazing speed  $\geq 4,5$  m/min.
