

Perfect welding results – highest process efficiency

Best service provides best value

UTP Maintenance offers more than best-in-class welding consumables, because in practice only perfect welds and highest process efficiency count. We are able to guarantee this through our outstanding application support for customers in all branches of industry worldwide.

Tailor-made Protectivity™

Delivering individual expert consultation to our customers, we are the industry partner who stays dependably at your side – from advice of process optimization to the welded product and beyond.

Uncomplicated, personal contact

Your access to our application services is your local UTP Maintenance contact. You can also send an E-mail to: application.services@voestalpine.com

Our application services provide:

- Product and technical consultation
- Process optimization
- Training courses and seminars

Process optimization

Welding with highest efficiency

Not only what you do is important – how you do it is decisive. Our application technicians/engineers are able to review your complete welding process and propose and implement concrete solutions for optimization. Weld defects and downtime are reduced and productivity increased.

Services

- Process consultation (analyses, productivity audit)
- Development and implementation of concrete welding process adaptations, in close co-operation with the customer.

Product and technical consultation

The optimal solution for your requirements

Our experts advise which filler material is optimal for our customers' base material, taking into account technical requirements specified for the weld, while observing process efficiency and relevant standards.

Services

- Selection of the UTP Maintenance product to meet the required classification
- Review of technical feasibility and economic efficiency
- Verification of compliance with operating standards, industry specific procedures etc.
- Advice on the application of the individual product
- After Sales Service: In addition to our welding recommendations, we provide information on proper storage and handling and assist with any questions as well as trouble shooting.

Education and training

Exchange of know-how to stay ahead

Each weld is as good as the person who is responsible for it. In the Application Technology Centers of our Welding Academy, we teach the skills that make our clients' technicians and enterprise benefit in the long run. Individual education and training can also be given at the site of our customers, to guarantee best results with the available welding equipment.

Services

- Individual product and welding training
- In our worldwide Application Technology Centers or at the customers' premises.
