

voestalpine Böhler Welding presents the next generation of seamless cored wires

On the 21st and 22nd of November 2016, voestalpine Böhler Welding invited customers and business partners to a one-of-a-kind product seminar and discussion to introduce the next generation of seamless cored wires.

voestalpine Böhler Welding CTO, Martin Peruzzi welcomed the participants in the company headquarters in Leoben to this 2-day event under the motto "Welding is going to be brilliant".

During a "Lunch & Learn"-session, the guests were provided with an extensive insight into the "Construction of concrete pumps using fine-grained steels" by Horst Jöbstl, GF Schwing GmbH, the "Welding of high-strength steels" by Michael Fiedler, voestalpine Böhler Welding GmbH and the "Product properties of innovative cored wires" by Michael Staber, voestalpine Böhler Welding GmbH.

Afterwards the participants had the chance to discuss their future needs for product development with our product experts and identify potential applications together with our application specialists.

The project team, represented by Product Manager Michael Staber and Global Application Engineer Michael Fiedler, and their achievements in this project were complimented by voestalpine Böhler Welding CEO, Günter Neureiter and Mr. Franz Kainersdorfer, Head of the voestalpine Metal Engineering Division. They thanked the project team for the knowledge and efforts they have invested in the development of these innovative seamless cored wires over the last years.

A product demonstration in the company's own welding laboratory rounded-off the second day of this event. Everyone had the opportunity to witness the unique welding characteristics of the new flux-cored wires and view the innovative production process during a plant visit in Kapfenberg.

All guests were invited to meet the project team at the voestalpine Böhler Welding booth at the "Schweissen & Schneiden" in Düsseldorf from the 25th - 29th of September 2017.

Photos of the event can be found [here](#).

About us

voestalpine Böhler Welding

Is a leading manufacturer and worldwide supplier of filler metals for industrial welding and brazing applications. As a part of the voestalpine Group, one of the world's leading suppliers of specialized steel products, voestalpine Böhler Welding is part of a global network of metallurgy experts. With more than 100 years of experience, the enterprise has decisively influenced the development of welding technology, setting the benchmark with its innovative solutions. With its three areas of competence – Böhler Welding for joint welding, utp maintenance for repair and maintenance welding and Fontargen Brazing for soldering and brazing – outstanding solutions for all challenging welding projects in demanding industries are offered. Metal Engineering Division

The voestalpine Metal Engineering Division is the global market leader in turnout technology and complete rail systems, and is the European market leader in special rails and quality wire. The division is also a leading provider of seamless tubes and high-quality welding consumables. Customer segments include the railway infrastructure industry, the oil and gas industry, the steel and construction industry, as well as the mechanical engineering and automotive industries. In the business year 2015/16, the division and its Steel, Rail Technology, Wire Technology, Tubulars, Turnout Systems, and Welding Consumables business units generated revenue of more than EUR 2.85 billion, of which around 43% was generated outside of Europe. The division, with its approximately 12,700 employees worldwide, reported an operating result (EBITDA) of EUR 385 million.

The voestalpine Group

The voestalpine Group is a steel-based technology and capital goods group that operates worldwide. With around 500 Group companies and locations in more than 50 countries and on all five continents, the Group has been listed on the Vienna Stock Exchange since 1995. With its top-quality products, the Group is one of the leading partners to the automotive and consumer goods industries in Europe and to the oil and gas industries worldwide. The voestalpine Group is also the world market leader in turnout technology, special rails, tool steel, and special sections. In the business year 2015/16, the voestalpine Group reported revenue of EUR 11.1 billion and an operating result (EBITDA) of EUR 1.6 billion; it had around 48,500 employees worldwide.
