Lasting Connections

BÖHLER FOX EV 60

Low-alloyed basic coated stick electrode

Main benefit

Basic coated stick electrode for high strength steels with 1 % Ni particularly high ductility at low temperatures.

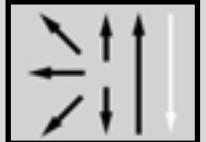

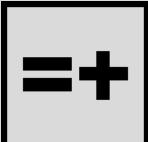

Product features	Product benefits	User benefits
» Ni content 0.9 % » High ductility at - 60 °C	» Suited for sour gas applications » Big service temperature window from -60 °C up to 350 °C	» Various applications in various high demanding industries
» Moisture resistant coating	» Very low hydrogen content in the all weld metal	» Electrodes can be used up to 9h after opening a Dry System packaging or a hermetical tin without re-drying
» CTOD approved at -40 °C	» Approved for welding of armoured plates	» Suitable also for special requirements like CTOD or SSC tests
» Available in Dry System vacuum packs	» Welding directly out of the package without re-drying	» Less time for preparation, always safe packed, fresh stick electrodes

Typical applications

- » Offshore industry
- » Steel constructions
- » Armored plates
