Sawing wire
Perfect wires for perfect solutions

Our passion - your quality

- From ore to wire from one single source
- Customized products designed to your needs
- The most advanced production facilities
- Super-clean wire rods for thinner wires
- Every millimeter of sawing wire with verified quality
- The best winding technology available
- The lowest breakage figures worldwide
- The lowest total cost of ownership
- Focus on long term partnerships
Available sawing wire

* Patent ArcelorMittal, plurality of crimps organized in two different planes

### Surface
- Standard surface is brass coated
- Other surfaces (e.g. zinc) upon request

### Quality control
- EN ISO 9001:2008
- For detailed information regarding our certifications visit our webpage www.voestalpine.com/wire

### Storage
- Under packed conditions: 9 months under shelter at ambient temperature and humidity
- Under unpacked conditions: 1 week, temperature 20° C ± 5° C, humidity < 65% relative humidity

### Your advantage
- The reduction of total cost of ownership (TCO) is an essential issue! Costs for slurry and wires have a significant impact on the TCO of the wafering operation itself.

- **Main benefits:**
  - Reduced value of saw marks
  - Low value and variation of TTV
  - High process capability
  - Less wire consumption per run
  - Shorter cutting time
  - Less slurry demand

- With our high performing and homogeneous saw wires you will be able to increase your:
  - yield
  - output
  - wafer quality
